Lexicognition AI

Event Overview

"Redefining Education" Lexicognition is the flagship AI event of Kshitij 2026, sponsored by Microsoft. With a massive prize pool of ₹75,000, this challenge focuses on "AI in Education." Participants must develop an AI agent that acts as a strict "Viva Voce Examiner" .

Problem Statement

Objective: Build an AI system that ingests a Research Paper (PDF) and conducts a Live Oral Examination of a human user to test their understanding of that paper.

The Workflow:

Upload: User uploads a PDF.
Generate: AI analyzes the text and prepares 5 conceptual questions.
Interview: AI asks one question at a time.
Evaluate: User answers (typed/voice); AI grades the answer (1-10) and checks for correctness before moving to the next question.

To ensure fair evaluation, the competition follows a Two-Stage Dataset Policy:

Stage 1 :

Participants must build and test their agents using the public paper: "Attention Is All You Need" (Vaswani et al.).
Goal: Ensure your AI understands concepts like "Self-Attention" and "Positional Encoding."

Stage 2 :

The Surprise: On the day of the finals, the organizers will release a New, Unseen Research Paper (e.g., a specific paper on Computer Vision or Physics).
The Challenge: Your AI must ingest this new paper on the spot and generate relevant questions from it immediately.
Why? This proves your model is truly intelligent and not just hard-coded for the first paper.

Competition Format

Round 1: Preliminary (Online - Deadline: 10th Jan)
Submission: A 3-Slide PDF (Idea, Tech Stack, & Flowchart).
Criterion: Does the team have a valid plan to handle PDF parsing (RAG)?
PDF to be sent on **lexicognition@ktj.in**
Round 2: Final (Onsite)
Task: Finalize the code to handle the "Surprise PDF."
Live Demo: The Judge will sit at your laptop, upload the Surprise PDF, and answer your bot's questions.

Judging Criteria :

Since every team uses the same "Surprise PDF," judging is objective:
Relevance (40%): Did the AI ask questions specific to the Surprise PDF? (If it asks generic questions like "What is the title?", you lose points).
Fact-Checking (30%): If the Judge gives a wrong answer intentionally, does the AI catch it?
Depth (20%): Does the AI ask "Why/How" questions instead of just "What"?
UX (10%): Chat interface quality.

Prizes

Winner: ₹37,500
1st Runner-up: ₹22,500
2nd Runner-up: ₹15,000

General Rules

Teams must register on the official Kshitij website.
A Team ID will be allocated upon registration.
Solutions must be original, not covered by any patents, copyrights, or prior publications.
Late submissions will not be accepted.
Updates will be posted on the event website and emailed to registered participants

PRIZE MONEY

Prize money will be awarded to the top 3 winning teams. Winners must submit the following details via email immediately after the results to prikshit.goyal@ktj.in

- Subject: Event Name, Team ID - Position
- Body: Account Holder Name, Account Number, Bank & Branch Name, IFSC Code.
